UNICORNBAGS
OPTIMIZED FUNGI GROWTH

MAY 18, 2022

TO WHOM IT MAY CONCERN :-

We certify that our bags use no recycled materials, No Bisphenol A (BPA), or Polylactic Acid (PLA) . We certify that we use no coating of any sort, unless such are requested by the customer, we certify that we do not use ink, no pigments, no epoxy, no printing unless clients request them.

Although our bags are not FDA certified, but we use only FDA approved resins for food contact, and our polypropylene resin is 100 percent virgin

Our bags are either PP for steam sterilization by customers, or PE delivered gamma ray sterilized. In either case, any and all microbes in the bags should be compromised except those introduced by the user.
